

# Latham Park Greenway Project

## Public Information Workshop March 17, 2014

This project was selected for State funding through NCDOT's Prioritization Process in 2010. The project will enhance the linkage of the Latham Park Greenway and the Lake Daniel Greenway while anticipating a future junction with the A&Y Greenway.

This project is possible due to a historically stable amount of vehicle traffic on Hill Street. And the need to improve safety is paramount with this project; by removing the free flow right turn from Smith Street onto Hill Street and providing a 12' wide paved area for pedestrians and bicyclists. The start of construction is expected to begin by Fall 2015.

Please take time to provide us with your written comments so that they may be properly documented. Any needed response will be provided as requested.

- Project Location
- Existing Greenway
- Proposed Greenway
- Proposed Greenway Connector

Map showing the proposed Dallas Greenway route through the city. The route is highlighted in green, with segments labeled as 'Project Location' (yellow), 'Existing Greenway' (solid green), 'Proposed Greenway' (dashed green), and 'Proposed Greenway Connector' (dashed blue). Key streets shown include Elm Street, Co. Road, Lawndale Drive, Battle Ground Avenue, Westover Terrace, Benjamin Parkway, Park Road Avenue, Oak Street, and others. The map also shows the Dallas River and surrounding urban areas.
